NATIONAL APPRENTICESHIP WEEK NOVEMBER 11-15, 2019

Apprenticeship week is an opportunity for the state and nation to share the success of this program in meeting employers' need for skilled talent. By building awareness of the positive impact that Wisconsin Apprenticeship has had on the lives of working families and on the bottom line of participating employers, apprenticeship week offers an invitation for others to learn more about the program. Apprenticeship week also provides an opportunity to recognize the collaboration between business and industry, education, career development, community-based organizations, students and workers that has kept Wisconsin Apprenticeship strong for over a century.
